

Product Information

HTC-007B Gas Fume Test Chamber

Use: Gas fume chamber, to determine the burnt gas fume colorfastness of textiles when exposed to atmospheric oxides of nitrogen derived from the combustion of gases.

Standard : AATCC 23, ISO 105-G02, GBT 11039

Sample rotating frame speed	2-3 r/min
Test box	SUS material, inner diameter: 500mm
Sample installation	6 root
Test Temperature	Less than or equal to 60 C
Specimen	40mmx100mm
Control method	PLC and Touch Screen contro
Burning gas	Chemically pure butane gas or Manufactured gas
Dimension	62x65x85cm(W*D*H)
Weight	About 75Kg
Power	AC 110/220V 50/60Hz
