

Product Information

HTF-010 Textile Spray Rating Tester AATCC 22 & ISO 4920

Use: Fabric Spray Rating Tester applies to determine the resistance of any fabrics, which may or may not have been given a water-repellent finish, to surface wetting by water. It is not intended to predict waterproofness, since it does not measure the penetration of water through fabric.

Standard: ISO4920 , BS EN 24920 , BS 3702 AATCC 22 , M&S P23 , NEXT 23

specifications

Glass funnel: $\phi 150 * 150$ mm (volume approximately 500 ml)

Sample press release angle: 45°

Nozzle head to the sample center distance: 150mm

Water spray quantity: 250ML

Dimensions: 260 x 230 x 550mm

Weight: 6kg
