

Product Information

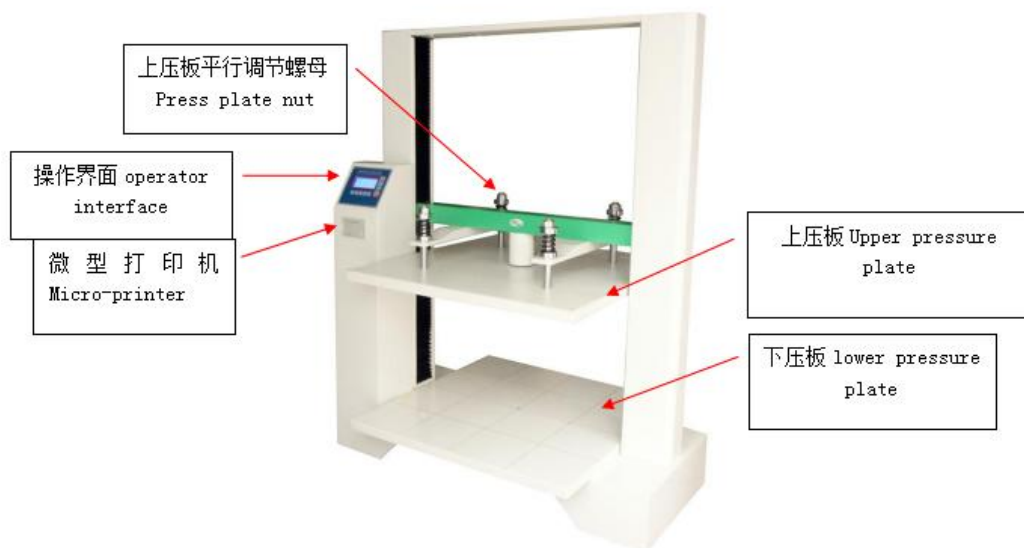

GB/T 4857 Carton anti-pressure test machine

Use: The machine uses a motor drive screw to move the pressure plate downwards, thus pressing the test sample; The pressure display automatically displays the strength value. Test the pressure strength of cartons or other packaging containers.

Standard :

GB/T 4857.4-92 , Packaging ,Transport package ,pressure test method

GB/T 4857.3-92 , Packaging, Transport package , static load heap code test method also applied to standards of GB,ISO,ASTM,BS,DIN,JIS or other international

measurement range	≤2000 kg
units	N、kN、kgf、gf、lbf
units	Pa、kPa、MPa、kgf/cm ² 、lbf/in ²
resolution	1 N
accuracy of the display	±1 %
Test speed	10±3 mm/min
Return speed	200.0 mm/min
size of the pressure plate	1200*1200 mm

Up and down pressure plate spacing	800 mm
---------------------------------------	--------

- Room temperature: 20C±10C
- Power supply: AC220V±22V, 50HZ, maxi current 1A, power supply should be reliably grounded.
- The working environment keep clean, there is no strong magnetic field and vibration source, and keep the workbench flat and stable.
- Relative humidity:< 85%
- Weight: approx 1000 kg
- size : 1860*1000*2030mm
