

## Product Information

**HTC-008-C Durawash Washing Test Machine**

**Test:** The Durawash machine simulates the conditions necessary to meet leading chain stores standard garment and fabric durability tests. The process control systems provide excellent accuracy and repeatability. The physical performance of the Durawash is compatible with that of the "Hoovermatic" Twin Tub and complies with the **Marks and Spencer Fabric Durability (C15) and Print Durability (P5)** methods of test. **The agitator speed is 560 rpm +/-2%.**

**Standard :**

Marks & Spencer P5, C15, 8A, 8B, 8C, BS 7907 etc .

东莞华科东尼仪器有限公司  
Dongguan Hust Tony Instruments Co.,Ltd.

**Specifications:**

Audible alarm and automatic agitator shut off

Temperature indication and control with and accuracy of +/-0.25% of controller range

Display resolution: 0.1 degree

System control and calibration accuracy better than +/-1degree

Solid state relay for silent switching reliability and zero electrical noise.

Magnetically coupled drain pump for reliability

Rev:560 r/min ±2%

Max Test Temperature:60°C± 2°C,可设定

Dimension: 70x67x90cm

Weight:≈60Kg

Power: 220V, 50-60Hz, 1 phase, 2750W

One Strong Plywood Box Package **Weight: 85kg, Size: 80\*75 \*120 cm**
