Luggage Vibration Impact Tester HTD-005-China Manufacturer

Product Introduction

The purpose is to test the strength of the tie rod, handle and overall structure of the bag, load the bag, etc., and impact the test at a speed of 20 times per minute, and the test results can be used as a reference for product improvement.

Features:

1. When the set time is reached or the backpack strap is damaged, the suitcase vibration shock tester stops automatically.
2. The company develops a control system with timing and counting functions by itself. There are start, stop, pause, count and clear functions on the test control panel.
3. Fast delivery, Good service.

Technical Specifications

Model	HTF-005
Impact Height	6 Inches (adjustable)
Max. load	100 kg
Oscillation Mode	Spring mode 17.54N/mm ($\pm 5\%$)
Testing Speed	10-30 r/min (adjustable)
Times Setting	1~999999 Automatic shutdown
Driving mode	Pneumatic Cylinder
Control System	PLC + touch screen (using man-machine interface control system, easy to operate, with power off, power saving function)
Additional Function	It would stop automatically if something goes wrong.
Gas Source	6KG/CM2 (provided by buyer)
Machine Dimension	1400×1200×2500 mm
Machine Weight	390 Kg
Power	1 ϕ , AC220V, 50Hz

Standard

QB/T 2922-2018, QB/T 5083-2018
