Mobile Phone Directional Drop Test Machine DZ-217A-China Manufacturer

Product Introduction

Mobile Phone Directional Drop Test Machine DZ-217A. This machine is used by customers to evaluate the impact of product drop on product performance in actual use.

Suitable for: mobile phones, PDAs, telephones, electronic dictionaries, CDs, MP3, adapters, batteries and other small consumer electronic products for original attitude and acceleration drop test.

Features

1. Direct manufacturers in China, with competitive prices
2. Strict quality, high precision, excellent after-sales service
3. This machine adopts electric components for test height adjustment, fast positioning and durable use

- 4.This machine adopts Japanese SMC vacuum cup adsorption products to achieve multi-angle drop, suitable for product testing: diamond, angle, surface test
- 5.The drop angle of the product is close to the test set angle
- 6.The drop test can automatically rise to the set height, which is convenient to operate and improves test efficiency
- 7.The pneumatic components are made of Japanese SMC high-quality components, which are durable to use.
- 8.A variety of drop plates are available: steel plate, transparent acrylic board, wood board), cement board, marble board, applicable to multinational testing requirements (standard product: marble drop medium)
- 9.Automatic counting (number of drops) function
- 10.Touch screen control, parameter setting is simple and convenient

Technical Specifications

Model	DZ-217A
Maximum Test Height	300~1800mm(adjustable)
Maximum Drop Weight	2kg
Suction Cup Angle	180°, 90°, 45°
Minimum Detachment Height	300mm
Counter	0~999999
Air Source	≥0.5MPa
Machine Size	700x1000x2100mm W*D*H
Machine Weight	150kg
Power Supply	AC220V 50Hz 3A
