**Plug Pulling Force Testing Machine TX-529A-Touch Screen Control-China Manufacturer**

## Product Introduction

This machine is suitable for a variety of connector plugging and plugging test, using embedded microcomputer measurement and control technology, can simultaneously display insertion force, pull-out force, real-time force value, and has the number of times setting, speed stroke adjustable, and display speed value, automatic zeroing, unit conversion, etc

The rotating eccentric wheel power design makes the test speed and the test stroke not correlated, and the test is equally fast for long and short stroke connectors. The most cost-effective plug-in life testing machine on the market today.

## Features

1. Direct manufacturers in China, with competitive prices
2. Strict quality, high precision, excellent after-sales service

## Technical Specifications

Model	TX-529A
Supply Voltage	220V±10%
Range of Number of Tests	0~999999

Speed Adjustable Range	5 ~ 80 times/minute (Digital display)
Stroke Adjustment Range	0~6cm
Display Mode	Large screen LCD real-time display
Machine Size	600(D)*470(W)*450(H)mm
Two Kinds of Unit Conversion	N、 KG
Inserting and Removing Force Range	0~50kg ( Optional)
Drive Mechanism	Rolling Screw
