## **Luggage Tumble Test Machine HTD-015-Luggage Tumble Test-Manufactuer**

This machine imitates the damage test of suitcases and other packaging boxes during transportation, such as dropping, impact, and rolling, and tests the protection ability of suitcases and contents, as the basis for product improvement.

### **Technical Specifications**

<b>Model</b>	HTD-015
<b>Roller Diameter</b>	72 inch (182.88 cm)
<b>Depth</b>	48 inch
<b>Roller speed</b>	2rpm (Can be set )
<b>Obstacles Specification</b>	96 degrees obstacles 3 groups
<b>Sample Size</b>	1000×700×400mm
<b>Metal rollers</b>	The inner cavity is a regular hexahedral cylinder (the distance of the inner cavity seal Angle line is 2200MM, the depth of the cylinder is 1220MM)
<b>Counter</b>	LCD display, 0-99999999 can be set
<b>Machine size (L*W*H)</b>	2300*1600*2600
<b>Net Weight</b>	About 1500 kg
<b>Power Supply</b>	AC 220V

**Test principle:** In the fall process, the cargo bracket first moves rapidly down and then rotates, to ensure the free separation of the bracket and the packaging test piece, to achieve the free fall of the packaging test piece, and to truly complete the drop test bench of the surface, edge and Angle drop test.

**Sampling requirements:** Finished leather cases.

**Results:** After the completion of the specified number of revolutions, check the damage condition of the box as the basis for quality control.
